Exercices – MVC, Login, 10p

1. This exercise is also continuing the previous exercise. You should create MVC model for the application. Follow the instructions at

   https://python.plainenglish.io/flask-crud-application-using-mvc-architecture-3b073271274f

   You should use MongoDB instead of the database shown in the instructions.

5p

2. Create Login Feature for your application. Follow the instructions shown in moodle / lectures or then the link https://www.digitalocean.com/community/tutorials/how-to-add-authentication-to-your-app-with-flask-login#step-9-adding-the-login-method
